DualVee® Stainless Steel Track

APPLICATION GUIDE

**PATENTED DUALVEE® FOOD
GRADE GUIDE WHEELS AND
STAINLESS STEEL TRACK**

INDUSTRY

Food Processing – Seafood Cutting

FISH CUTTING CONVEYOR

DualVee Motion Technology® guides automated rejection system for food cutting operations

APPLICATION DESCRIPTION

Bishop-Wisecarver® DualVee guide wheels and track provide a reliable motion axis to control the space between conveyor belts in a fish cutting operation. The conveyor automatically enlarges the gap at a high speed to allow tail trimmings to fall through, and then closes the gap to receive the next set of fish slices.

WHY BISHOP-WISECARVER

- Reliable DualVee Motion Technology®
- Stainless steel guide wheels and track
- H1 food-grade grease
- High speed guide wheels – up to 5.5 m/s
- DualVee® guide wheels wipe away food debris
