MadeWell® Radial Wheels
DualVee® Track

Industry: Agriculture

Sliding Greenhouse Door

The combination of MadeWell® Radial Wheels and DualVee® track allow for compact and weather-resistant solution.

Application Description

Sliding doors are common in greenhouse applications because they save space and come in a variety of sizes. MadeWell® radial wheels are perfect for lighter loads, but still maintain durability in movement and weather conditions.

Why Bishop-Wisecarver

- MadeWell® wheels easily installed using off-the-shelf fasteners and simple hand tools
- Stainless steel vee shaped guide wheels are corrosion-resistant and wipe away debris
- Offers low-maintenance motion solutions

Solution

MadeWell® stainless steel vee shaped guide wheels and DualVee® linear tracks allow for smooth and reliable linear motion in debris-laden environments.

Bishop-Wisecarver's MadeWell® technology enabled easy and cost-saving installation of a dirt and corrosion-resistant linear motion assembly for a sliding greenhouse door.
